

## Introducing Cloud School Parent

We are delighted to introduce the Parent application for our schools: Cloud School Parent.

We know that good communication between school and parents improves educational outcomes. We have designed the Cloud School Parent App with this in mind.

Parents like to have a clear view of what their child is doing in school. The Cloud School Parent makes this possible. The Cloud School Parent Application provides a real time view of your child's whereabouts and behaviour. This means you know instantly if your child was present and on time for their lesson, how they behaved in each lesson with updates from their teacher about the things you need to know.

### Safe and secure

The safe and secure Cloud School Parent Application is simple to download and easy to use. Look out for an invite from us to download and start using the application. Once you have downloaded the application simply, log on with the username provided by your school. Once in the application you have the option to set up your finger print ID ensuring your child's data is safe and secure.

### Behaviour

A real time view of your child's behaviour means Teachers will not need to contact you for minor behaviour issues. Instead, they will update the application, making that information instantly available to you.

Knowing what is going on means you can take appropriate action, if required.

### Real time vision

Keeping your child safe is of the utmost importance to us. Through the Parent Application, you will get up to the minute information about your child's attendance. If your child is not attending classes or late this is easy to see and makes it easier for us to work together to keep your child safe and on course for great results.
